Experience

Sittercity (Dec 2015 - current)
Software Engineer II, Front End

- Collaborated with designers to build reusable Vue components for our design system and Storybook.
- Developed unit and UI component tests using Jest and Vue Test Utils.
- Implemented features that are mobile-first and fully responsive.
- Incorporated Tailwind CSS to a major project.
- Advocated for high quality standard of code in the form of pull request feedback and pairing with other engineers.
- Improved the performance scores for main page
- Researched best practices for accessibility and trained other engineers on accessibility standards.
- Refactored parts of site to be accessible.
- Drove adoption of accessibility testing tools to reach WCAG Level AA compliance.

Skills & Tools

HTML5, CSS, Sass, Tailwind CSS, Responsive Design, Mobile-First, JavaScript, TypeScript, Vue, GraphQL, Apollo Client, Vue Test Utils, Jest, Cypress, Git, Storybook, axe DevTools

References

Devin B.
Full-stack Developer

She proved to be an amazing engineer and is always a delight to work with. On top of modernizing the technology, she took an admired approach to ensure Sittercity's application is accessible by all users.

Hannah A.
Product Manager

Byonca is fantastic about communicating and holding the team to best practices. Her commitment to accessibility has been and will continue to be a tremendous asset to the business and future product decisions.

Jaclyn M.
Lead Product Designer

Byonca is an asset for any designer to have implementing mock-ups to screen. Her attention to detail and accessibility knowledge are invaluable. I appreciate her ability to collaborate and flexibility to try new ideas.

Josh M.
Product Designer

Byonca is an amazing partner for a designer. She is thorough with designs, delightful to work with, and an inspiring advocate for accessibility. I've learned a lot from her and continuously feel challenged to learn more.
